IIT Delhi graduate building product modules, data analyses and automations at Basic Home Loan, with hands-on machine learning and LLM projects.

Experience

Basic Home Loan | Automation & Product Operations — June 2026 – Present

- **Field check:** built a Vercel + Supabase app where RMs log franchise visits and business; partners raise issues.
- **Agent Flash:** co-built an in-app module that routes new agents, and agents orphaned when an RM leaves, to RMs by location, profession and team; expired agents get an automated WhatsApp re-engagement message.
- **Lead Flash:** applied the same model to leads from the Builder Alliance and Strategic Alliance channels, which RMs claim and take to closure.
- **Unclaimed payouts:** found mismatches between bank receipts and agent payouts; co-built a module where RMs claim suspense cases, Bank MIS verifies them and RMs track status.
- **CleverTap reactivation:** built a journey fed by an n8n workflow pulling live BASIC console data, targeting agents with no leads in 30 days with an extra-payout incentive.
- **Zoho Desk:** set up multi-rule ticket assignment and auto-escalation of tickets left unanswered for 7 days.

Venwiz Technologies | Data Science Intern (Remote) — May – June 2024

- Built LangChain agent workflows to automate email distribution and data management.
- Built a Python ETL pipeline (scraping, Openpyxl) feeding Plotly Dash KPI dashboards; shipped a Lovable + Supabase app for portal data ingestion.
- Segmented customers with K-Means (scikit-learn) to uncover retention and churn patterns.

Projects

RAG Agent with Web Search & Memory | LangGraph, Chroma, Tavily — Jul – Aug 2025

- LangGraph agent with typed routing, an anti-hallucination judge, Chroma RAG, Tavily web fallback and session memory.

Resume Highlighter, Eightfold AI Innov8 Challenge | Gemma 2B-IT, PyMuPDF — Oct – Nov 2024

- Ranked resume lines by cosine similarity to Gemma 2B-IT keyword vectors; highlighted the top 20% in 3 colour tiers.

American Express Decision Science Challenge | LightGBM, HMM, SHAP — Jun – Jul 2024

- Ensembled LightGBM with HMM state features (stratified CV, isotonic calibration); SHAP surfaced form, position and injury drivers for coaching decisions.

Spotify Streaming Analytics Dashboard | Power BI, SQL — May – Jun 2024

- Modelled 149k+ streaming records with KPIs, YoY analysis, drill-downs and heatmaps to surface listening patterns.

Education

IIT Delhi | B.Tech, Civil Engineering — 2022 – 2026

Class XII 95.4% (2021) and Class X 87.6% (2019), HBSE. Research: aerosol optical depth analysis across 16 Indian stations (2019–2023) with Prof. Ravi Kumar Kunchala.

Skills

Languages	Python, SQL, Java, C++, MATLAB
ML & LLMs	scikit-learn, LightGBM, SHAP, PyTorch, TensorFlow, Hugging Face, LangChain, LangGraph, RAG
Data & BI	Pandas, NumPy, Power BI, Excel, Plotly Dash, Matplotlib, Seaborn
Product & platforms	CleverTap, n8n, Zoho Desk, Supabase, Vercel, Lovable, WhatsApp Business

Achievements & Leadership

- **JEE Advanced 2022:** AIR 852 among 2 lakh+; **JEE Main 2022:** AIR 2860 among 10 lakh+; **Winner,** Creative Coders Hackathon (May 2025).
- **Production Coordinator, TRYST'25** (1 lakh+ attendees): led 5 activity heads across 50+ events in 4 days; 3x engagement on sponsor content.
- **Core Team (Creative), Rendezvous'25:** 250+ creatives; +60% social engagement, +40% sign-ups.
